EDUCATION

B.Tech in Computer Science and Engineering (CSE) — VIT Bhopal University Sep 2023 – Jul 2027
GPA: 8.76/10

CORE TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Spring Boot, Spring Data JPA, Hibernate

Databases: MySQL, MongoDB

Tools & Technologies: Git, GitHub, Maven, Docker, Firebase Authentication, Cloudinary, AWS (Basics)

PROJECTS

V-CART – Full-Stack E-Commerce Platform Link May 2026–Present

MERN-stack e-commerce platform with voice navigation, admin dashboard, and secure payment workflows.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Web Speech API, Razorpay, Cloudinary, Firebase (OAuth), JWT.

- Architected a dual-portal e-commerce system with a decoupled React storefront and Node/Express admin dashboard.
- Devised a voice-controlled navigation assistant using the Web Speech API for hands-free command routing.
- Implemented dual authentication (Firebase OAuth + JWT in HTTP-only cookies), mitigating XSS risks and strengthening session security.
- Engineered a multi-image upload pipeline with Multer and Cloudinary for CDN-backed product rendering.
- Designed a dual-payment workflow (Razorpay + Cash on Delivery) with real-time order synchronization in MongoDB.

EMPLOY-NET – Full-Stack Job Portal System Link May–Jun 2026

Full-stack job portal enabling recruiters to publish job listings and job seekers to search and apply, with role-based access control and transactional database operations.

Tech Stack: Node.js, Express.js, MySQL, JavaScript (ES6), JWT, CSS3, AWS.

- Built a modular MVC job portal using Node.js, Express.js, and vanilla JavaScript.
- Designed a normalized MySQL schema with transactions for atomic multi-table operations.
- Implemented JWT authentication, bcrypt hashing, and role-based authorization middleware.
- Deployed the full-stack application on AWS with Node.js/Express and MySQL.
- Added input validation and HTML escaping to reduce malformed input and XSS risks.

STUDENT MANAGEMENT REST API – Production-Ready Backend Service Link Jul–Aug 2026

Modular RESTful API for academic records with dynamic multi-criteria filtering, server-side pagination, and centralized validation.

Tech Stack: Java 17, Spring Boot, Spring Data JPA, Hibernate, MySQL, Docker, Maven, Swagger UI.

- Built a modular Spring Boot REST API with DTOs, 5 endpoints, and standard HTTP status handling.
- Implemented dynamic multi-field filtering and pagination using JPA Specifications and Pageable across 5 query criteria.
- Centralized validation and exception handling with Jakarta Bean Validation and `@RestControllerAdvice`.
- Built parameterized Criteria API queries and configured global CORS to improve API security.
- Containerized the API with Docker and integrated SpringDoc OpenAPI 3.0 / Swagger UI for documentation and testing.

ACHIEVEMENTS

- **EY Techathon** — Smart Railway Management System
  - Qualified Round 1 among **4,667+ teams** by proposing an AI-driven railway scheduling solution.
- **College Annual Sports Fest** — Chess Tournament
  - Finished **7th among 250 participants**, securing a place among the **8 finalists**.
- Solved **300+** DSA problems across **Codeforces**, **LeetCode**, and **GeeksforGeeks**.

CERTIFICATIONS

- **Advanced Software Engineering Internship Program** — MpOnline
- **Cloud Foundations** — AWS Academy
